# How the arts can benefit your mental health

Research suggests that colouring books, music and poetry can boost your mood

The notion that art can improve mental well-being is something many people can lose sight of, especially if they have become disconnected from the dancing, creative writing, drawing and singing they used to enjoy as children.

## Don't play down the importance of the Aesthetics

# What research says...

Other studies have found that singing reduces levels of cortisol, your body's main stress hormone.

Music can be effective at reducing stress because things like rhythm, repetitive lyrics and chords engage multiple regions of the brain.

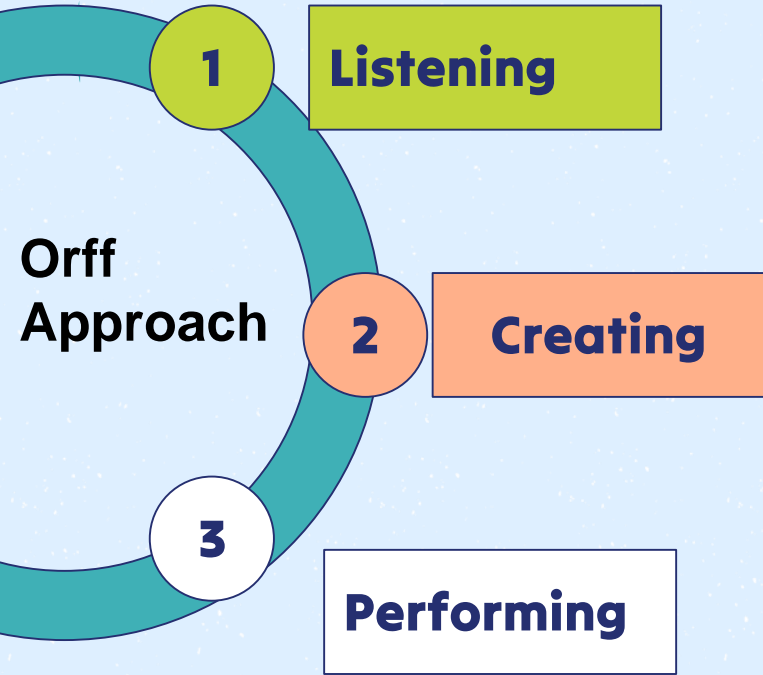

There is a 'really robust body of evidence' that suggests that creating art, as well as activities such as attending a concert or visiting a museum, can benefit mental health
