Dear Parents/Guardian,

P1 Term 2 PE, Art & Music updates

Physical Education

We have come to the end of Term 2 and here are some updates on the lessons conducted in P1 PE. The students have been taught the following skills. They have also learnt some health-related topics based on the My Physical Education Journal.

Gymnastics

1. Travelling in space using locomotor movements (e.g. running, skipping, walking etc.).
2. Jumping using one foot and two feet for distance and height. Jumping with one foot and two feet, take-off to form different shapes before landing with control.
3. Point (i.e. on a small body part) and patch (i.e. on a large body part) balances on different body parts.
4. Rock using round-tuck shape (e.g. egg roll).
5. Roll using narrow-stretch shapes (e.g. pencil roll).
6. Perform a sequence of two different movements with smooth transition.

For Gymnastics modules, students are generally competent and able to demonstrate good body control. They were able to string movements together to perform a smooth sequence with confidence.

Outdoor Education

1. Move confidently across a variety of ground surfaces within the school compound.
2. Identify potential physical hazards including ground surfaces and foreign objects.
3. Know possible risks associated with the physical hazards.
4. Know distinctive physical features of various places in school.
5. Engage five senses to notice and wonder when exploring the immediate surroundings in school.
6. Know observable flora and fauna of various places in school.

For Outdoor Education, the girls showed confidence as they explored the school compound independently. They were able to identify potential hazards and move safely while avoiding them. They also showed great observation skills as they spotted different plants, animals and insects in our school.

My Physical Education Journal

This term, students learnt more about school as well as how to care for the school environment. Together with the Outdoor Education Module. The girls were taught how to play safely around the school and to take care of the environment as they use them.

All these components formed the basis of their assessment. Through the activities carried out, the students also learnt values like sportsmanship, teamwork, and responsibility in using and keeping the equipment. Generally,

students have performed well in their assessment and are able to show their understanding in both physical and health components.

Health Fair Week

During this year's Health Fair Week, students had the opportunity to learn about healthy living through a series of engaging and meaningful activities. One highlight was the carnival-style games designed and facilitated by the students themselves for their classmates, allowing them to learn collaboratively through play. On one of the Fridays, a parent-child bonding session through inline skating was also conducted after school, providing families with an opportunity to spend quality time together while staying active.

During recess, students participated in interactive games held at the sheltered Basketball Court. In addition, representatives from Diabetes Singapore set up informative booths where students learnt more about sugar consumption through hands-on games and activities. Students also brought home bread with reduced sugar content as part of the healthy eating initiative.

To round off the week-long celebration of healthy living, students had the opportunity to purchase fresh fruits and vegetables from a stall organised by the Parent Volunteers, reinforcing the importance of making healthier food choices in their daily lives.

During the upcoming June holidays, we highly encourage students to stay active and safe. Their free time is also a wonderful opportunity to revisit and practice the skills they learned this term!

Best regards,
Ms Teo Siew Huai
Primary 1 PE Level Representative

Art

It has been a colorful and fulfilling term for our Primary 1 students. Our curriculum this term continued to focus on **Portraiture and Form**, encouraging students to move beyond simple drawings toward a deeper observation of the world around them.

Exploring the World of Fernando Botero

Our young artists had a wonderful time discovering *The Bird*, the iconic, eye-catching sculpture located by the Singapore River. Through this study, they were introduced to the world-renowned artist Fernando Botero and his signature style of "Boterismo," characterized by large, rounded volumes.

From Identity to 3D Creation

The students also explored the concept of symbolism, learning how different countries choose animals to represent their core values. This sparked a meaningful reflection: "Which animal best represents me?"

- **Shape Recognition:** Students learned that the world around them is composed of shapes. They identified these shapes and used them to draft their chosen representative animals.
- **From 2D to 3D:** Using Botero's sculpture as a guide, students transitioned from flat drawings to three-dimensional forms. They explored techniques in air-dry clay, including modeling, joining 3D shapes, and structural attachment.
- **Artistic Comparison:** During class discussions, students compared their own creations with Botero's *The Bird*, sharing insightful observations on the similarities and differences in form and texture.

The Art Portfolio: Documenting the Journey

Art is as much about the process as it is the final product. To wrap up the module, students documented their journey through planning sketches and written reflections. They even composed their very own Artist Statements to explain the personal meaning behind their sculptures.

Parental Engagement: We invite you to look through the portfolio with your child/ward. Please take a moment to complete the Module Exit Ticket together, providing a wonderful opportunity for your child/ward to share their creative journey with you.

We look forward to more inspired creative sharing in the term ahead!

Best regards
Ms Cheng Sok Mung
P1 Level Art Subject Representative

P1 Music

This term, our Primary 1 students learnt to sing in solfege using familiar songs introduced in Term 1. Through their understanding of solfege, hand signs, and note values such as crotchets and quavers, students collaborated with their partners to create their own 2-bar compositions.

Students were also introduced to the concept of soundscapes. Working in their friendship groups, they had an enjoyable time creating their own soundscape based on the nursery rhyme "Humpty Dumpty". Using their voices and classroom percussion instruments creatively, students explored different ways to depict the sounds and scenes from the story.

These lessons provided students with opportunities to develop their listening skills, musical creativity, teamwork, and confidence in expressing their musical ideas independently.

Best regards,
Mrs Amy Ng
Primary 1 Music Level Representative
